Certificación

PM ENGINEERING es una empresa conformada por un grupo de Ingenieros cuyo propósito es ofrecer un conjunto de herramientas innovadoras y servicios con la finalidad de optimizar o maximizar el rendimiento de cada uno los procesos que conforman su industria, garantizando reducción de los costos, calidad de productos, supervisión profesional con logística calificada, aportando de esta manera para un mejor desarrollo y renombre empresarial. Asumimos cada proyecto como propio, resaltando nuestro profesionalismo, determinación y responsabilidad para resolver las necesidades o problemas de nuestros clientes garantizando el éxito operativo y económico en cada proyecto.

Auditoria

La detección temprana de posibles fallos en los procesos de producción, evitar que un problema sencillo se convierta en uno sumamente grave, incluso sujeto a posibles sanciones. El equipo de PM ENGINEERING está preparado para llevar a cabo auditorías que permitan a nuestros clientes tomar decisiones partiendo de los resultados mostrados, bien sea para hacer correcciones, ajustes o modificaciones, de ser necesario, y así alcanzar los objetivos planteados. **Contáctanos**

Gestión de Procesos

Administrar todas las actividades, optimizando cada ruta en cada punto, es el propósito de PM ENGINEERING, aportando un conjunto de soluciones vanguardistas que le permiten alcanzar los resultados esperados.

Control de calidad

La función principal de los controles de calidad es asegurar que los productos o servicios cumplan con los requisitos mínimos de las estándares de calidad, a través de estos controles se trazan los mecanismos enmarcados en las normas internacionales, esto garantiza que los clientes obtengan tanto el mejor servicio como el mejor producto.

Introducing our new
Club Poker

Club Poker is here to give you an additional revenue stream and another wagering option for your players to enjoy.

Collect rake in Cash Games and Tournament Fees!

Since the player is not betting against the house, every week is a sure winner as you collect from all transactions!

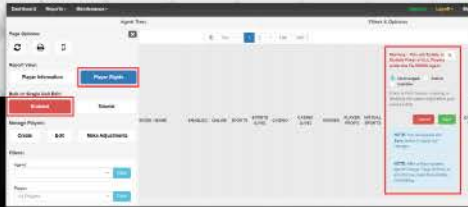

- Shared wallets and the automatic creation of cash tables make it easy for you! All you need to do is turn Poker on, and you are good to go!
- With our custom tables and customizable shared visibility, you can also control exactly how and with whom your players play.
- Ensure a steady income stream by encouraging your players to play! The more they play, the more you'll make!

Why should I offer Poker?

The previous COVID-19 sports lockdown proved one thing: bookies need to diversify their product portfolio to hedge their chances and increase their profits. Club Poker gives your players an enticing reason to keep playing, regardless of what happens.

How can I enable Poker?

Turn on Poker for your players by going to the Player Management screen and enabling it on Player Rights.

Club Poker Features:

- Shared Wallet**
Your players' balances will be available to be transferred to Poker.
- Plug and Play:**
Automatic cash tables will be created whenever they access the Club. No setup required.
- Buy-In Limits**
You can set your players' Daily and Weekly Win and Loss limits by accessing **Maintenance - Limit Management**. These apply to amounts bought in and out of the poker tables, but they do not limit the wins/losses by hand within the table itself. Players will be blocked once they buy out with wins/losses above or equal to the limit you set.
- Visibility Controls**
Poker Clubs are isolated by subagent as a default, but you can create tables with shared visibility through our Customer Service team, so all the players under your hierarchy can play each other.
- Custom Table Creation**
Rake is set at 5% as a default. However, we can create new custom tables should you want to have limits or table settings different than the default ones.
- Integrated Reporting**
Know how much your players win/lose, and how much rake they generate for you. Detailed hand histories are available upon request.

Poker Tournaments to be added shortly!

Streamlining your Poker Network!

Poker is a game of volume, which means that the more your players play, the better you will do! Players bet against each other, and you as the house, rake in a commission on each table. In order to be profitable, you will want your players to generate as much activity as possible, which means that you'll have to make more payments and collections. Good news is **WE CAN HELP YOU WITH THAT!**

Integrate our Agent Payment Solution to your Poker network to ensure that payments and collections are a breeze!

- Take payments from your players from anywhere, at any time, through Credit Cards, Cryptocurrencies and MoneyGram.
- Keep them playing by receiving instant payments for credit increases.
- Buy your players out through Crypto or MoneyGram.
- Our 2-step verification process ensures that your funds are safe at all times. Only you have access to approve payouts and credit deposits.
- Increase your safety, and save time and effort by avoiding constant player-agent meetings.

Contact Customer Service to set up the Agent Payment Solution for your account.

We just made making money for your easier. The agent payment system is now for credit card, crypto and money gram through player sites.

- Call CS for more info.

WHY SWITCHING TO BITCOIN TODAY

Bitcoin is the digital currency that everyone's talking about and it's revolutionizing how we trade and spend money. Most of our customers are resorting to Bitcoin because it is fast, secure and holds no transaction fees!

- Immediately available deposits
- High amounts can be funded
- Bitcoin is convenient, secure and easy to use
- Another cryptocurrency we accept is Ethereum. Most Bitcoin wallets will also offer this option.

Why are our clients resorting to Bitcoin?

FAST
Buying Bitcoin won't take more than 30 minutes.

NO FEES
We do not charge fees on Bitcoin payments, making it the perfect way to get your money to.

SECURE
Blockchain technology makes this digital currency secure, transparent and virtually untraceable.

PRIVATE
No names, government agencies or third parties involved. You control your own funds.

How do I start using Bitcoin today?

GET A WALLET!

A wallet is a place to keep your Bitcoin until you spend them. Wallets are free and quick to set up. There are several quality mobile, desktop, and hardware wallets available for you. You just have to choose a wallet that adjusts to your needs.

BUY BITCOIN

Did you know? You can buy Bitcoin instantly with your credit/debit card or even your checking account through a regulated exchange.

SEND YOUR BITCOIN TO YOUR WALLET

Some exchanges will ask for your wallet address before you make a purchase. If not, you'll need to send money from your exchange account to your wallet. Don't worry, it's easy.

1. Select "Send Bitcoin" in your exchange account.
2. Copy & paste or type your wallet address into the input field and click "send".

YOU'RE FINISHED!

Congratulations! If you made it this far, you're well on the Bitcoin path. You're ready to start spending your Bitcoin!

BECOME AN EXPERT

Types of Bitcoin Wallets

Mobile Desktop Online

Mobile Bitcoin Wallets

Download a Bitcoin wallet from the App Store or Google Play Store for an enhanced security Bitcoin experience. Mobile wallets are free to download, are QR code enabled, and make for instant payments and transactions.

How to Buy Bitcoin

Regulated Exchanges Peer-to-Peer Exchanges Bitcoin ATM

Regulated Exchanges

Think of this like purchased currency from a financial institution. This is a safe and secure way to exchange funds online, and to purchase Bitcoin. Many of these exchanges will require a picture of you for personal verification — but the process is fast and secure.

More Bitcoin Information

Keep detailed records of where you store your Bitcoin. We recommend using a mobile wallet over online wallets or exchange services.

When making peer-to-peer transactions, only deal with accounts that have high satisfaction ratings from previous experiences. If you are storing Bitcoin for a long period of time, we recommend using a paper wallet or downlodable wallet.

Only use a Bitcoin address once. Please note that most wallets will automatically do this for you.
